Weili Qiu: An associate professor of physical geography in the School of Geography, Beijing Normal University (BNU), is interested mainly in the research of Geomorphology and Quaternary Environment. He was a visiting scholar in Sydney University, Australia, from Jul. to Nov. 2002, in a program of teaching science in English. Now he teaches a bilingual course of Physical Geography for undergraduates, Geomorphology and Excursion of Physical Geography -- an English course -- for master students. The latter was originated from a collaborative field trip of the School of Geography, BNU and the Earth Science Centre, Gothenburg University, Sweden in 2001. It became a master course since 2012.
